**ONE SOLUTION TO FIT ALL YOUR NEEDS**

**Who We Are**

Hunt Computer Design LLC provides public sector software that fully services all of your department's needs. We have been developing advanced, user friendly software for the public sector since 1989. We have developed powerful, completely integrated and very flexible software packages that will tie together all aspects of your department's daily functions, helping to create faster and more efficient department operations.

**Our Software**

We have developed our software based on the needs of our users. We understand that no two agencies operate under the same policies and procedures. *That is why we customize our software to meet your departments' specific needs.* All of the software modules in our suite of products can be seamlessly integrated. This will eliminate all duplicate data entry allowing for faster, more efficient department operations.

**Hunt Public Safety Municipal Software Suite**

| Forms                   | NFIRS       | Software Integration |
| Departmental Management | Inspections | Custom Modules       |

**Testimonials**

*The Naugatuck Police Department has been using Hunt Computer Design Software since 1993. Throughout the years not only has the Hunt Team resolved minor issues with software, they would help us troubleshoot hardware and networking issues that had nothing to do with their product, saving the Borough of Naugatuck thousands of dollars. Hunt Computer Design offers a CAD/RMS solution that is fully customizable at a price that no other software company can match.*  
 ~ Lt. Robert Harrison Naugatuck Police Department.

*I am constantly amazed at your continued responsiveness to our unique requests for modifications to your system based on our current needs as well as how meticulously you maintain the current system. Again, my sincere thanks for all you have done and for the service which you provide to our department and our community.*  
 ~Chief Douglas Fuchs Redding Police Department.
